

CLOZAPINE - IT'S UNIQUE EFFECTIVENESS IN REFRACTORY PSYCHOSIS

November 2018 pathways Public Education
Lecture Series

Dr. Randall F. White , Medical Director, UBC Hospital Psychosis Program & VCH Medical Director Vancouver Community Mental Health and Substance Use Services

A significant proportion of individuals with psychotic illness are either refractory to, or intolerant of, standard antipsychotic pharmacotherapy. There is currently only one medication available with proven effectiveness in this population. Clozapine while providing a superior response rate requires significant physical health care monitoring both before and during treatment. Please join Dr. White to learn more about clozapine and it's effectiveness in the treatment of refractory psychosis

WEDNESDAY, NOV. 28, 2018 7:00PM—8:30PM
HOPE CENTRE ATRIUM—13TH AND ST. ANDREWS
NO REGISTRATION REQUIRED.
